DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

DA VINCI CODE

Round 2 (UNLOCK-N-MOVE)

RULES

- This round contains 25 questions.
- A series of c,c++ questions will be there in which the output of the previous question will generate a password to unlock the next question.
- Answer for a question should be in exact format as given according to the code.Only trailing spaces and newline character can be ignored in the answer submission.
- Password is in lowercase alphabets and digits.
- Your ranking in the leaderboard will depend on the number of correct submission done by your team.
- For each wrong submission, a penalty will be awarded which may affect your rank in the leaderboard.
- In case the number of submission of any 2 teams is same,the rank will be decided on the basis of least number of penalties.If the number of penalties are also same ,least submission time will be taken into account for your ranking.
